

I urge the FCC to continue hearings on broadcast ownership. There is absolutely NO reason to take a vote at this time. This is a slap in the face of democracy. The issue is just now becoming known to the people of this country. (They have NOT been adequately informed by the media-coincidence?) The diversity of ownership is essential to honest, open information. I fear a homogenized media that has ties to the government. It is the first step toward "state owned media" which is dangerous and very unAmerican.
